Art Unit: 3662

1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Throughout claims 1-8, the uses of "and/or" are indefinite and unclear.

Throughout claims 1-8, the uses of the word "electromagnetic" are indefinite and unclear in context as to whether RF is meant or light is meant.

Throughout claims 1-8, the uses of "initial fuel burn" and "electromagnetic frequency disturbance" are indefinite and unclear in context. For example, does "initial fuel burn" just mean launch or does it extend to the entire boost or lift phase?

Throughout claims 1-8, the uses of the word "anomalies" are indefinite and unclear in context.

Claims 1, 7, and 8 are indefinite and unclear due to the use of the phrase "at least one" in that the use of the phrase in context makes each of these claims potentially a single-means or single-element claim. Please see MPEP 2164.08(a).

Dependent claims 2-6 are unclear in that they depend from unclear independent claim 1.

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-6 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 1 claims software that does not reside on a

computer-readable medium. Please see the Guidelines in MPEP 2106, especially section IV.B.1. of the Guidelines.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The examiner-cited prior art is of general interest as being related to missile detection and defence.
